KEY BENEFITS

Individual Locking Bins & Drawers

Supports real-time BCMA

Supports Centralized or Decentralized Medication Fill Workflow

Exchangable Medication Cassettes

Secure & Track Patient Medication

Advanced Li-Nano Technology w/ 5 Year Warranty

Closing the loop of medication delivery between pharmacy and the patient bedside.
AccessRx MD ™

Medication Security & Visibility at the bedside

- Individually locking, patient-specific drawers can be accessed by scanning the patient ID barcode
- Real-time bedside medication administration, barcode patient identification and direct eMAR API access streamlines BCMA process, reduces redundancy and increases accuracy
- Patient drawers automatically assigned using the ADT (Admission/ Discharge/Transfer) interface, eliminating time consuming and error-prone manual drawer labeling
- Utilizes the hospital's Active Directory for consistent user authentication
- Configurable drawer display fields allow customization of the user interface

Streamline Your Workflow

- Secures and tracks patient specific medications for up to 12 patients in individually-locking drawers, reducing trips and time spent at the ADC
- ADT and patient orders transmitted via wireless network to the cart to facilitate faster medication delivery
- Reduce trips to and time spent at the automated dispensing cabinet

TouchPoint
MEDICAL

More Control & Flexibility for Pharmacists across a variety of pharmacy distribution models

- Browser-based AccessManager™ console provides access to reports while allowing for Active Directory-compatible user management, fleet management and system configuration

- Configurable, time-based access controls reduce the risk of medication administration at an incorrect time and aid in pharmacy reconciliation for unused medications

- Optional medications orders interface – Rx MD can act as a patient medication order filler and verify that an order has been administered.

- Secure Pharmacy email alerts for transferred & discharged patients

Scalable & Centralized Software Architecture and Integration

- Multi-Org - scaleable architecture - ability to scale from two bed clinic to multi facility health system

- Ability to set up health system access rights, such as by department

- Enterprise reporting available

- Enterprise multi-facility deployment

- HL7 compliant, ADT interface (patient demographics), and RDE interface (Pharmacy approved orders)

- Configurable interface engine easily communicates with the HIS

- Project management, installation and training by TouchPoint Medical's professional services team

Configure your system to meet your medication and supply requirements.

AccessRx Exchange™

AccessRx Exchange™ Workstation on Wheels

- Restock easily wherever your need. Can easily be filled in the pharmacy and exchanged or directly at the cart.
- Key lock or eLock security options
- Easily retrofit your existing AccessPoint™ workstation on-site with the Exchange Cassette system
- May be added to powered or nonpowered carts
- Works with both manual and electric lift carts

Exchangable Cassettes

- Restock easily and directly on the mobile workstation or wall mount
- Available in two, three or four tier sizes & multiple bin sizes and supply drawer options
- Load rated up to 2.2kg (5.5lbs) per tier
- Compact footprint fits 600mm x400mm cart or (ISO 3394 modular systems) cabinet

Transfer Carts

- All transfer carts include locking tambour door
- All transfer carts include extended handle
- Lock options include key lock or e-lock
- Single width, front loading option
- Double width, side loading option

Designed to support your storage and workflow preferences

- Support in-room med station workflows and storage with the cassette wall-mounting kit.

- Key lock or eLock security options

Easily adapt your existing AccessPoint™ fleet with the AccessRx Exchange™ system

- Retrofit your existing workstations on-site with minimal downtime

- May be added to powered or nonpowered carts

- Works with both manual and electric lift carts

Flexible Locking Options

Push Button eLock Features:

- 20 codes per lock: 19 User codes and one Supervisor code; code length is 4-8 digits

- 7500 cycles (extended battery life)

- ADA compliant

- Low battery indicator

- Battery compartment is easily accessible from outside of the cassette

Key Lock Features:

- Removable lock core

- Unique lock/key series for cassette carrier, cassettes, and controlled substance drawer for enhanced security

- Side shuttered lock with symmetrical keying

Store and secure your medications to the bedside.

AccessRx Secure™

Secure your medications throughout your workflow

- Individual locking drawers
- Easy-to-use software
- Storage configurations to secure a variety of medications and controlled substances
- Smoked polycarbonate 4" & 6" drawers
- Aluminum locking storage and controlled substance drawers
