Making a Difference

Accessing technology at anytime and anywhere, working safely within healthcare environments, and enhancing productivity are just some of the ways that we are making a difference in mobile computing. Below are other ways Altus is differentiating itself in today's healthcare market.

1. Ease of Mobility:

Giving you a **lightweight (as low as 34 lbs.)** and highly mobile solution (**100 mm rollerblade casters**) helps assist you with delivering technology where you need it.

2. True Sit to Stand adjustment capability:

Ascend® lift technology offers 18" of effortless sit-to-stand height adjustment range with an easy, ergonomic height adjustment hand lever.

3. Counterbalance System:

With each cart there are different worksurface and accessory weight variables. For maximum performance, we offer four (4) counterbalance systems (lite, medium, standard and heavy duty).

4. Small footprint:

With our cart being only 18" wide, we are helping you fit into tight spaces.

5. Ships fully assembled:

Saving you time and money.

6. Color Choices:

Nine 3D Thermofoil worksurface colors (Three solid, two abstract and four wood grain) so you can match our carts to the color palette of the room.

7. Customization:

There are various needs for every healthcare environment. That is why customization is key. Let our professional sales and engineering team help you customize your cart.

8. Technology Security:

Keyed and keyless accessibility provides theft-protection securing laptops, thin-clients and patient records.

9. Accessories & Cable Management Options:

Customize your cart with the accessories you require. Only pay for accessories you will use.

Color choices to fit any healthcare environment...

Our nine 3D Thermofoil worksurface color choices help healthcare facilities create a calming and healing aesthetic.

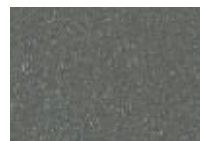

All of our worksurface colors have built-in safety and comfort. From a smooth finish to color flexibility, healthcare environments can be easily designed with patients and caregivers in mind.

*Depending on the total weight of your technology equipment and accessories, we offer three counterbalance systems for maximum performance: Lite Duty (LD), Medium Duty (MD), Standard Duty (SD), and Heavy Duty (HD).

The following guideline illustrates which system is best for your individual use. To start guideline equation, add model number weight + optional accessory(s) weight + technology component(s) weight.

1		+2		+3		=4	
MODEL # (worksurface and included accessory)	TOTAL WEIGHT (LBS.)	OPTIONAL ADDITIONAL WORKSURFACE MOUNTED ACCESSORY(S)	ACCESSORY WEIGHT (LBS.)	TECHNOLOGY COMPONENTS (Devices)	ESTIMATED WEIGHT (LBS.)	RECOMMENDED COUNTERBALANCE SYSTEM	LIFTING LOADS (LBS.)
