

Brilliant Function - Beautiful Design

Healthcare Workstation Solutions

ELLIOTT
DATA SYSTEMS, INC.

A COMPLETE SOLUTIONS COMPANY

Patient Room Computing Stations

Cygnus keeps care close to the patient in a controlled, uncluttered environment. This harmonious blend of form, function and flow maximizes a positive healthcare experience for patients and staff, promoting quality of care and ultimately, facility reputation.

Features

- Adjustable self-closing door
- Push-button mechanical lock on upper medication box and main compartment
- Cutout for power and data access in lower cam-locked CPU compartment
- Universal CPU & monitor bracket*
- Antimicrobial finish (Metal)
- Top and bottom ventilation panels

Options

- Custom configurations available
- Push-button electronic lock
- Dual extension 180° articulating arm with monitor tilt and adjustable keyboard tray *
- A/C cooling fan Assembly
- Tambour door
- Mouse holder
- Lights: LED or halogen

** Options and features with depth. Please contact a representative for details.*

Hallway Computing Stations

Drawing on its more than 20 years of experience in healthcare work spaces, we recognize the multitude of pressures that influence facility managers. That's why our charting stations, storage and one-hand locking cabinets are not only handsome furniture pieces, they also comply with both Joint Commission (JCAHO) patient safety goals and NFPA Life Care Codes.

Features

- Push-button mechanical lock
- Cutout for power and data access
- Cable management
- Universal CPU & monitor bracket
- Top and bottom ventilation panels
- Antimicrobial finish (Metal)

Options

- Custom configurations available
- Push-button electronic lock
- Mouse holder
- Lights: LED or halogen

Laptop/Charting Computing Stations

Decentralized nursing improves charting accuracy, promotes infection control and eliminates unnecessary transport of materials and equipment.

Designed for the needs of standard paper and laptop charting, we have designed our solutions with simplicity and functionality. Models can be fitted with lights, locks and can be matched up with coordinating medication boxes.

Tablet Computing Stations

Caregivers love the flexibility of using laptop and tablet computing options for electronic health records. Our cabinet and arms offer a place for connected use and charging. Our cabinet options offer the additional benefit of secure storage.

All of our cabinets have the ability to adapt to the tablet computers thanks to the VESA compliant mounting bracket. Below are several options which our product development team has created.

Medication Boxes

Our medication boxes are available in many shapes and sizes and are available with keyed cam, spring locks or mechanical push-button, electronic keypad or networked locks. Wood medication boxes are finished with thermoformed laminate finishes. Metal medication boxes are finished with an anti-microbial powder-coated, baked on appliance finish. All medication boxes can be mounted with your charting or computing station or serve as a self standing solution.

In addition to the basics our innovative designs are keeping up with the automated medication systems trend. We are your partner in medication safety with designs for McKesson envelopes.

Features

- Metal with powder-coated finish or Class-A, fire-rated wood laminate
- Antimicrobial finishes available in both wood and metal

Options

- Networked, push-button mechanical or electronic keyless lock
- Several larger medication boxes have options for shelving as well as drop down work areas.
- Custom configurations available

Lock Options

No matter what your security needs, we have a solution for you. Standard keyed locks, digital locks and our IP based lock can be added to all of our workstations and medication boxes.

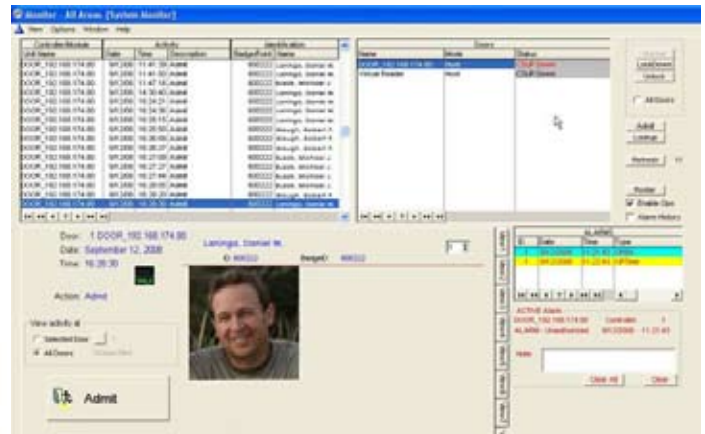

Our controllers connect directly to the data network via existing LAN wiring. The panel-free system places real-time control in the hands of your security administrator.

Proactive Security

Security and privacy are important to you and it is to us too. While push button and keyed locks do the job, the administration can be cumbersome and costly.

With our industry exclusive network locking system, the entire system of cabinets can be configured on one screen at the touch of a button. The cabinet can be opened with the swipe of a proximity card and records a complete audit trail. Users can be added and deleted in seconds from a standard internet browser.

NetLock

ip access control

Advantages over old-fashioned, panel-based access control:

- TCP / IP Direct Connectivity
- Open System built with MS Windows
- Reads proximity cards
- Power Over Ethernet built in
- Easy remote administration
- Web administration option

Articulating Arms

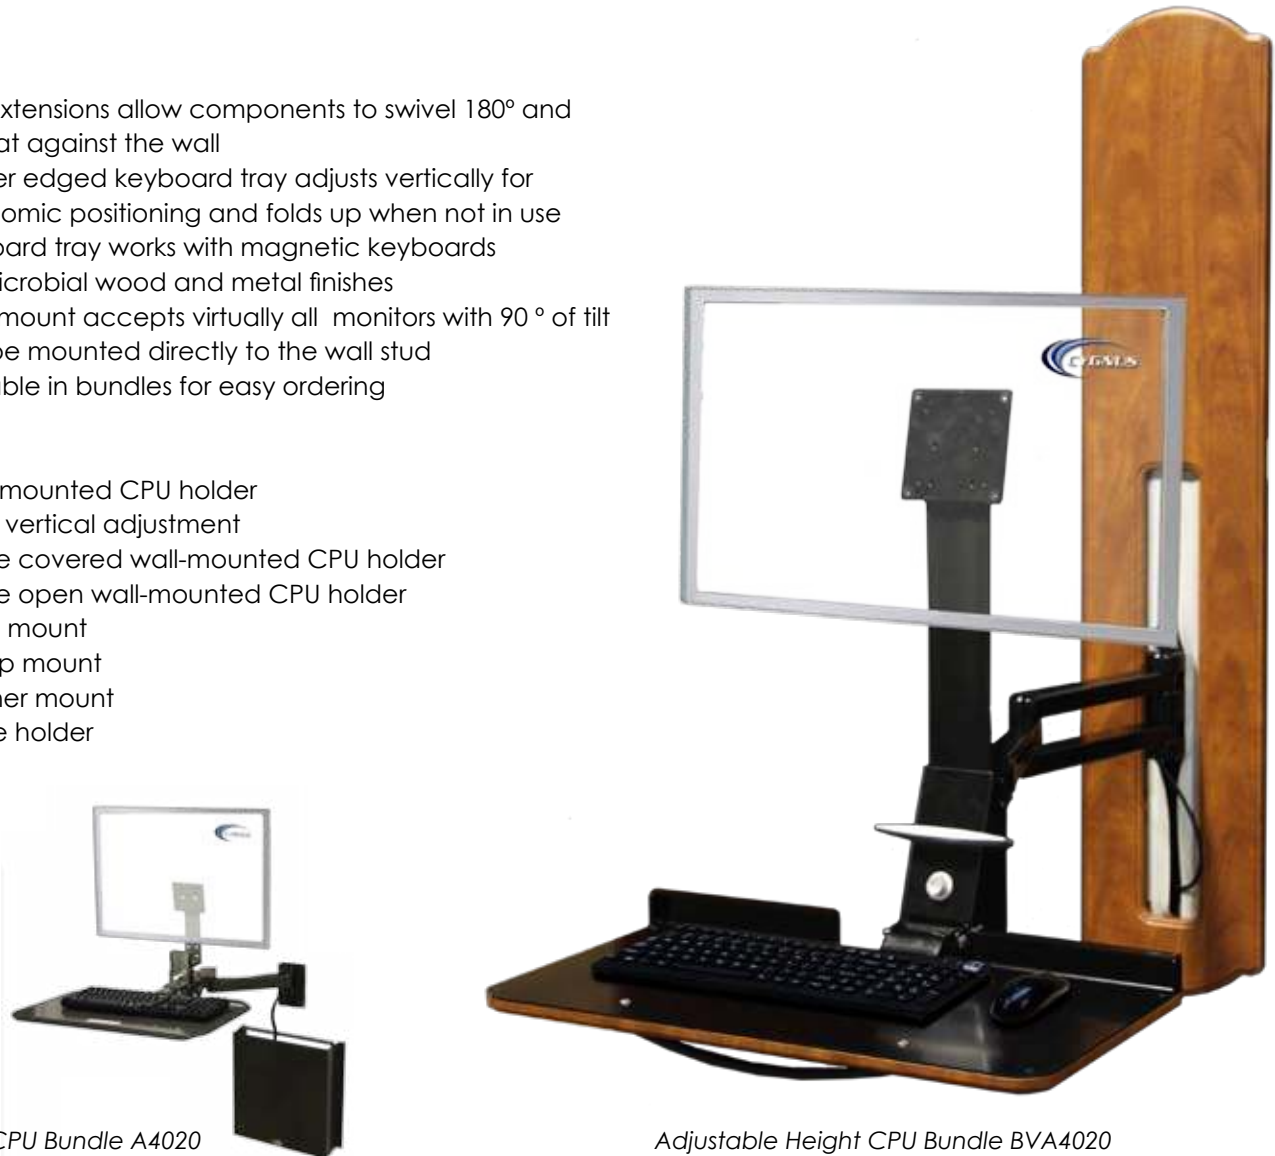

Our revolutionary A4020 expandable arm adjusts to supply caregivers with an adjustable ergonomic workstation in a moment's notice. Caregivers gain a flexible solution that allows the caregiver to look into the eyes of the patient. This staff and patient-friendly solution eliminates interruptions during charting and reduces potential errors.

Features

- Arm extensions allow components to swivel 180° and fold flat against the wall
- Rubber edged keyboard tray adjusts vertically for ergonomic positioning and folds up when not in use
- Keyboard tray works with magnetic keyboards
- Antimicrobial wood and metal finishes
- VESA mount accepts virtually all monitors with 90 ° of tilt
- Can be mounted directly to the wall stud
- Available in bundles for easy ordering

Options

- Track-mounted CPU holder
- 15" of vertical adjustment
- Secure covered wall-mounted CPU holder
- Secure open wall-mounted CPU holder
- Tablet mount
- Laptop mount
- Scanner mount
- Mouse holder

Mobile Computing Stations

Cygnus Understands Mobile Computing

The selection of a mobile computing cart is about high-performance processing and a simple-to-use product solution. We also understand it is about product value and reliability.

The hospital computer cart & work stations offer convenience features such as the powered height adjustment. This permits the user to position the monitor and keyboard at the perfect height for standing at the bedside or recording data while seated.

VITAL STATISTICS

Features

- 16" of vertical adjustment
- Oversized 4" dual wheels
- Antimicrobial paint & work surface laminate
- Fits oversized laptops and keyboards
- Foot triggered height adjustment
- Keyless lock

Customized Solutions

Cygnus promotes decentralized care and helps healthcare facilities meet Joint Commission standards by creating in-room computer areas and medical storage solutions that keep caregivers close to the patients. Designed with ergonomics, function, efficiency and safety in mind, Cygnus products can help any healthcare facility combine style, innovation and technology to increase productivity and minimize risk.

Metal Colors

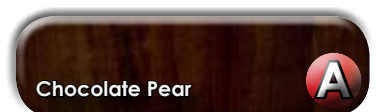

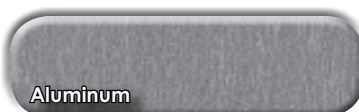

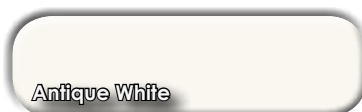

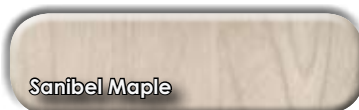

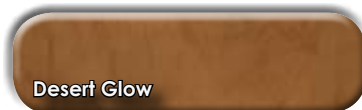

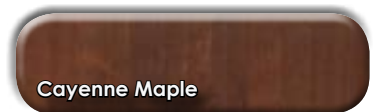

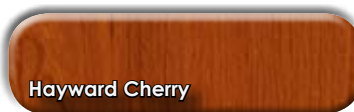

Our metal cabinets come in six standard colors and a rainbow of custom colors. Metal cabinets come standard with antimicrobial paint.

Wood Finishes

 Antimicrobial Finish

A sample of some of our most popular 3D laminates.

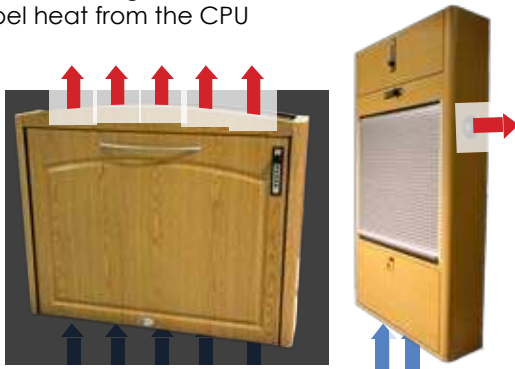

Universal Mounting Brackets

While others charge for adaptive features when equipment changes, Cygnus cabinets come with equipment migration in mind. Our universal mounting bracket systems adjust to change when your needs change.

- Easy on, easy off brackets were designed with IT in mind.
- Brackets can be moved to any position along the rail.
- Brackets are secured into the rail with locking handle.
- Rails are height adjustable.
- CPU bracket depth is adjustable.
- Monitor bracket has multiple sets of VESA mounting holes.

Perfect Airflow

Our passive options provide internal cabinet temperatures 4° above room temperature. For more complicated cabinet designs, we do offer electric fans to help expel heat from the CPU compartment.

Anti-Microbial Finishes

We recognize the threat of infection in healthcare facilities. We are doing OUR part by offering all of our metal cabinets standard with antimicrobial finishes. Antimicrobial coatings are used to provide supplemental protection against the growth of microorganisms in a widerange of applications. Bacteria, fungi or algae, when present, can produce unwanted odors, causediscoloration, create biofouling or produce mildew. In certain cases this can also lead to degradation orcorrosion of the base material.

Conformity

All Cygnus products meet or exceed every applicable health code and regulation – including those established by HIPAA, Joint Commission and the ADA. Also, our products meet standard life safety and OSHPD requirements.

Warranty

We offer the longest warranty in the industry. We offer a 5-year warranty against defects in materials, workmanship and finish of the cabinet under normal use. A 2-year warranty applies to the door lifting systems.
