

# Asset Manager

*Identifying your assets and tracking their usage just got easier!*

Asset Manager is a software solution designed to manage and track assets such as equipment, supplies, electronics, vehicles, etc. Any item that can be labeled with a barcode can be logged into the Asset Manager software and assigned to a department, agency, or any kind of group. With Asset Manager, you can quickly and easily generate reports detailing who has used or is currently using any asset and view inventory details.

## Asset Manager Basics

Asset Manager software is comprised of two basic components - Asset Client & Asset Server. Both elements provide certain functionality that support different user capabilities. Asset Manager Systems can be configured to best suit the needs of each organization.

## Asset Manager Features

- > Label assets with barcoded asset tags.
- > Assign assets to people.
- > Associate assets using a parent/child category relationship.
- > Link documents to assets such as POs and invoices.
- > Schedule and track maintenance on vehicles and equipment.
- > Generate asset reports for accountability.
- > Attach documents to assets and meet the needs of NFPA 1851 and 1852.
- > Track products by department, grant and purchase date.
- > NIMS resource typing included.

### Asset Server

- > Web Application Accessed Via a Web Browser or Locally Installed
- > Maintain a Centralized Database
- > Upload Photos
- > Manage Asset Data Among Multiple Departments (Create, Edit, or Delete Records)
- > Control Access Settings for Each User

### Asset Client

- > Software Installed Locally on PC
- > Capture Photos
- > Connect to USB Peripherals (Scanners, ID Printers, Cameras, etc.)
- > Print Asset Labels Centrally or Locally

Each component can be used as a stand-alone solution or can be combined in a number of possible configurations. Asset Manager is designed to provide users the ability to manage asset data and assign assets to personnel by checking items in/out using a locally installed system or from any location using an internet browser. This provides a cost efficient umbrella solution by managing multiple locations using one solution that supports one centralized database.

### Mobile Command Case

Integrate Asset Manager with this fully integrated, turn-key, self-contained workstation that includes everything you need to photograph, identify and label assets immediately on-site.

**Easily transport to multiple locations with little to no preparation!**

## Companion Products

The Asset Manager software can be integrated with other hardware and software products to enhance the solution and build a more comprehensive system resulting in greater effectiveness and success when managing assets.

### Mobile Command Cases

The Mobile Command Case is a turn-key, integrated solution packaged as a compact, self-contained workstation. This case is designed to quickly be transported and setup with little to no preparation.

- Available as a standard or mini command case.
- Protected by a durable, water tight mobile case.
- Track people away from the command workstation.

**Easily transport to multiple locations with little to no preparation!**

### Mobile Tracking Devices

- Track assets away from the command workstation.
- Wirelessly connect to the command workstation by transmitting data in real-time.
- Add multiple applications to each device.
- Search an asset database.

### Stationary Tracking Devices

- Use multiple interfaces.
- Capture data stored on a 1- or 2-D barcode RFID or magstripe ID.
- Constant focus for unattended scanning (hands-free intellistand).

### Data Server

- Remotely synchronize your Command Center with the Data Server.
- Doubles as a backup for data recovery.
- Synchronize and share data with many Command Centers.
- Tailor options of access to other Command Centers.

### Emergency Event Manager & Elliott Clinic Manager Solution

- Enroll patients on-site.
- Dispense medication and supplies.
- Choose from multiple card designs.
- Know who is and is not on-site.
- Instantly issue positive ID on-site.
- Provide a dynamic medical questionnaire.
- Generate accurate reports quickly for federal reimbursement.

### ID Badging System

- Multiple security features to choose from.
- Increased durability with virtual edge-to-edge laminates.
- Instantly issue quality IDs within minutes.
- Include color photos, logos & background images on IDs.
- Theft-detrant software and hardware lock system.

## Additional Features

- > Link documents to assets such as POs and invoices.
- > Issue asset tags by:
  - Using Asset Manager & label printer.
  - Purchase preprinted tags.
  - Add a machine readable tag currently on the asset and it in the Asset Manager System.
- > Create a second record using Duplicate Asset button.

### Minimum Requirements

- CPU CORE 2DUO 2.0 GHZ w/AMB Cache
- Windows 7 64 Bit or Windows 7 Pro 32 bit
- 10/100 network card
- SQL 2008 R2 Express
- 2 GB Ram
- 20 GB free hard drive space
- Adobe Reader (free version)
- 4 USB 2.0 Port
- Clean power

### Optional Accessories

- SmartReg
- Tethered scanner
- Stationary reader
- Handheld devices
- Asset tag printer
- Capture solutions

Contact Elliott Data Systems, Inc. for more information or a free demonstration.
