

# EPIC Track-SE (Self Enrollment)

*Instant self enrollment application used to register small or large groups of new members on the spot and check them into events or locations.*

## Perform Membership Registration & Event Tracking from Anywhere, Anytime, & for Anybody Using EPIC Track-SE!

Organizations can now issue preprinted member ID cards with a unique, secure url and member ID # QR barcode to obtain and identify new members easily while administering and managing member registrations from multiple locations. Once membership cards have been issued, the EPIC Track App software allows users to scan member ID QR barcodes and check them into an event within seconds using their smartphone or self-scanning with a kiosk device.

## Maximized Connectivity

The **EPIC Track App** connects wirelessly to the EPIC Track Server, which is hosted on an Internet Cloud. Mobile devices connect via public WiFi, local WiFi or cellular. Data may be stored directly on the mobile device and later synchronized if a connection is lost.

### Distribute Member Cards/Tags

- > Sell memberships by issuing preprinted member cards from anywhere.
- > Each member card includes a unique QR barcode with a secure url that links to an online member registration page.
- > Each card's member ID # is displayed on the card for visual verification & stored in the QR, which may be scanned to ID.

### Members Self Register to Join

- > New members scan the unique QR barcode on the membership card using any QR barcode scanner app to access an online registration form and fill out 1-3 lines of contact information.
- > Once they've entered their basic contact information, their membership is instantly approved & membership term begins.

### Track Members at Events/Locations

- > Administrators may then scan the member card with that person's unique QR barcode using the EPIC Track App from a smartphone or kiosk device to identify the member & check them into an event or location to track their participation.
- > Manage events using a count threshold with one member scan per event.

### Check Real-Time Status & Reports

- > Check member status in real-time & generate reports on all member data & activity during events they have participated in.
- > Manage members & events from anywhere using a PC or tablet to view report data.
