

# Mobile Solutions® Asset App

*Update Asset Inventory from Any Place, at Any Time within Seconds!*

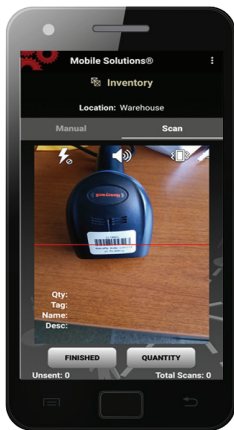

## Manage assets quickly using your mobile device.

Using the Mobile Solutions® Asset App from a smartphone, tablet, or handheld device allows users to perform inventory management, register a new asset, and replenish assets from any location. Users can securely access asset data including quantity, tag #, asset name, and description using the Mobile Solutions® Asset App.

  Compatible with Android™ & iOS operating systems.

### Inventory Management

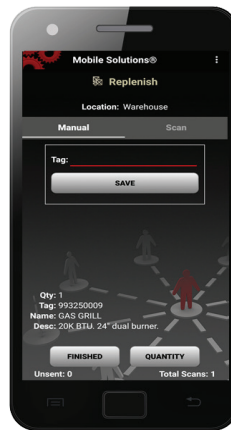

Keep an accurate asset inventory, by updating your asset management software from anywhere, at any time. Simply enter an accurate count of assets in-hand, while on-site.

### Register a New Asset

Identify and track any item from small electronics or expensive tools, to large vehicles and machinery. Track items by department, grant and purchase date.

### Replenish Assets

Restock inventory by manually entering an item or scanning it's barcode before entering quantities added to inventory.

### Maximized Connectivity

The Mobile Solutions® Asset App connects wirelessly to the Mobile Solutions® Data Server, which is hosted either locally at the Command Center or on an Internet Cloud. Mobile devices connect via WiFi, Cellular, Local WiFi, or a Network.

If a connection is lost or cannot be established, data collected & managed by the Mobile Solutions® Asset App is stored directly on the mobile device. Data can be synchronized once a connection is made.

### Enterprise Grade Device

The XT1 handheld device provides a more ruggedized mobile device to partner with the Mobile Solutions® Asset App. It's features provide a higher level of quality for a solution that meets enterprise & government requirements including IP54 standards.

### MS Asset App

\*Licensing required for full functionality.

Contact Elliott Data Systems, Inc. for more information or a free demonstration.
