Elliott Clinic Manager

A medication management solution designed to work with the Emergency Event Manager and Asset Manager Mobile Solutions®.

Mobile Solutions®
By Elliott Data Systems, Inc.

The Perfect Tool for Health Departments

The Elliott Clinic Manager Solution (ECMS) is a software solution designed to provide healthcare related emergency first responders the ability to enroll recipients, collect medical questionnaires and dispense medication during an emergency response when integrated with Elliott's Emergency Event Manager and Asset Manager Mobile Solutions®. Health Departments large and small are able to track resources and medication from the warehouse to the Point of Distribution to the recipient using one complete accountability and identification solution.

Recipients are quickly enrolled with the simple swipe of a driver's license and the population of all their information into the Elliott Clinic Manager software. From there, authorized personnel are able to manage the person's information, issue medicine and supplies to the recipient and create a report on all the necessary information regarding the recipient and the aid provided to them and their family.

Optional Accessories

• SmartReg	• Asset tag printer (Asset Manager)
• Tethered scanner	• Wristbands
• Stationary reader	• Capture solutions
• Handheld devices	• Webcam
• Triage tags	• Label printer

Minimum Requirements

|	
• CPU - P4 2GHz	• 10 GB free hard drive space
• Microsoft XP or Windows 7 Pro 32 bit	• Adobe Reader 7.0 (free version)
• 2 GB Ram	• Clean power

ECMS Features

> Enroll recipients on-site.

> Provide a dynamic medical questionnaire.

> Produce Face Sheets with a barcode.

> Group family members.

> Dispense medication and supplies.

> Prevent recipients from receiving duplicate medication.

> Manage medication by lot, NDC #, unique ID, and expiration date.

> Track recipients throughout an event by scanning their Face Sheet, wristband, or credentials.

Medical data is obtained using an algorithm-based questionnaire.

Companion Products

Elliott Clinic Manager software can be integrated with other hardware and software products to enhance the solution and build a more comprehensive system resulting in greater effectiveness and success.

Mobile Command Cases

The Mobile Command Case is a turn-key, integrated solution packaged as a compact, self contained workstation. This case is designed to quickly be transported and setup with little to no preparation.

- Available as a standard or mini command case.
- A mobile, compact design makes it easy to transport and store each case for quick access.
- Protected by a durable, water tight mobile case.
- Includes a wireless router that enables multiple PCs with the web based module or Elliott Clinic Manager to connect to it allowing many workstations at one clinic.

Easily transport to multiple locations with little to no preparation!

Data Server

- Remotely synchronize your Command Center with the Data Server.
- Doubles as a backup for data recovery.
- Synchronize and share data with many Command Centers.
- Tailor options of access to other Command Centers.

Mobile Tracking Devices

- Track personnel and patients away from the command workstation.
- Wirelessly connect to the command workstation by transmitting data in real-time.
- Manage multiple entry and exit points at a site.
- Add multiple applications to each device.
- Search a personnel database.

Emergency Event Manager

- Instantly issue positive IDs on-site.
- Know who's on- and off-site.
- Choose from multiple card designs.
- A flexible, interoperabile system.
- Track & manage personnel & volunteer data.
- Integrate other dept./organization credentials at an event.

Asset Manager Solution

- Tracks products by grant, department & purchase date.
- Track information on items that require maintenance.
- Generate asset reports for accountability of state and federal grant purchases.
- Associate assets using a parent/child category relationship.
- Use a handheld device for quick & easy inventory tracking.
- Assign assets to people.

ID Badging System

- Multiple security features available.
- Increased durability with virtual edge-to-edge laminates.
- Instantly issue quality IDs.
- Include color photos, logos & background images on IDs.
- Theft-deterrant software and hardware lock system.

IDPix 1000 Professional

- One click photo capture & auto cropping.
- Quickly capture high quality photos.
- Cable management.
- Ability to integrate with multiple cameras & software.
- Reliable, consistent performance.
- Streamlined design & function controls.

Express Enrollment & Dispense

Two software solutions designed to work together to perform an automated patient enrollment and medication dispensing process during a prophylaxis event.

- Capture patient demographic data and medical information using web tools.
- Streamlined workflow reduces number of staff needed at POD location.
- More efficient process of enrolling patients and dispensing medication.
