

Vocational & Higher Education

Mobile Solutions® Package

Mobile Solutions® offers educational institutions the opportunity to easily automate their identification and accountability program. Integrate your pre-existing student database and begin managing student data including photo verification, student ID number, emergency contact, etc. Track students by checking individuals in/out at school labs, workstations, dormitories, etc. Assign assets to students such as chrome books, tools, computer/lab workstations, etc. Generate reports to review data collected on student activity campus-wide with internet access.

IDENTIFY & MANAGE DATA

- > Enroll students.
- > Print quality photo ID cards.
- > Issue IDs to campus visitors.
- > Manage student data.
- > View student certifications.

ASSET MANAGEMENT

- > Identify department assets.
- > Assign assets to students.
- > Time stamp asset check in/out.
- > Track routine asset maintenance & inventory.

TRACK ACTIVITY

- > Check students in/out of classes, locations, or workstations.
- > Track students time spent onsite.
- > Scan IDs using smart phones or rugged scanners.
- > Perform real time status checks.

REPORTING

- > Run history reports on student activity.
- > View student attendance & check in/out time stamps.
- > Easily access audit trails & applied grant funding.

Mobile Solutions® Products

Mobile ID 1.0

Mobile ID is an integrated software solution that has the ability to capture personnel data, manage that information in a shared database and print secure IDs.

Users can manage personnel records from an online Mobile ID web application or a Mobile ID client based traditional software solution that includes the ability to work with an ID printing system to print secure color photo ID cards.

Asset Manager

Asset Manager software identifies and tracks assets of all types and sizes by scanning barcode item tags and assigning items to a person or group. Asset Manager software provides detailed asset data management that includes assignments, inventory management, maintenance alerts, activity reports, and much more.

Items can be managed using Asset Manager online or locally installed in order to print asset barcode tags.

EPIC Track

EPIC Track is a basic tracking solution that can be used to track people, places and things. The software provides a time stamp during check in/ out by scanning a barcode ID or selects from drop down lists of data.

EPIC Track is very flexible with it's ability to track using a smartphone, adapt to any basic check in/out tracking scenario, and perform on- or off-line making it easy to use in any location.
