Mobile Badging Unit

Easily transport your Identification System to any location and operate with little to no preparation.

An All-In-One Mobile Badging Unit

The Mobile Badging Unit is a fully integrated, turn-key solution packaged as a compact, self-contained workstation that includes everything you need to photograph, identify and print IDs immediately on-site. The Mobile Badging Unit is designed to quickly be transported and setup with little to no preparation. Just lift the lid, power up and you're ready to go!

This workstation is a complete solution used to issue credentials on-site and can be integrated with other mobile solutions to track personnel and assets and manage information. The durable, water tight casing can house a command workstation, badging system, cable management, mobile tracking devices and badging supplies while protecting the equipment from atmospheric hazards.

Positive Identification

1. Provides both a stand alone or networkable solution that can quickly capture a driver's license or state issued ID, then populate a database.
2. A secure ID is produced on a high quality plastic card.
3. Credentials are presented and distributed within minutes.

Mini Mobile Badging Unit

MBU Specifications

Weight: Varies depending on components included.
Standard Case: Typical weight is 102 lbs.
Mini Case: Typical weight is 65 lbs.

Dimensions:
