INTEGRATED TECHNOLOGY SECURITY SOLUTIONS

OVER 50 YEARS OF INNOVATIVE SOLUTIONS & SERVICE

Elliott provides integrated technology solutions that deliver multiple levels of physical and digital security through identity verification, access control, video surveillance, and more.

SECURE IDENTIFICATION

PHOTO IDENTIFICATION

Elliott works with users to create and support a comprehensive, cost-effective photo identity program that makes sense for organizations. Choose from desktop or high issuance printers, ID software, and photo capture devices to build your ID card printing system.

Ask Elliott about their Smart Trade program to learn how much your old ID card printer is worth upon trade-in.

DIGITAL CREDENTIALS

Protect identity data using enhanced security during online and mobile transactions. Ensure secure access to websites, enterprise VPNs and cloud apps, portals, PCs, buildings, and more. Perform multi-factor authentication before accessing multiple data sources from a single point of administration.

SUPPLIES & ACCESSORIES

Elliott Data Systems offers an array of ID card supplies and accessories that support anything from basic ID card stock and lanyards to high level security feature supplies such as smart chip/EMV cards and holographic laminates.

COMPREHENSIVE SOLUTIONS

SECURE ID CREDENTIALS

Print secure credentials backed by intelligent technology. Personalized ID cards and badges grant cardholders access to protected areas or networks, while reducing the risk of fraud with durable, highly secure topcoats, laminates, and tactile impressions.

ID CARD FEATURES

Protect ID cards against fraud and counterfeiting using secure features such as:

- Security overlays such as holographic, microprinting, or OVDs
- Contact or contactless smart card or RFID technology
- Personalization with photos, signature, etc.
- Durability overlays to protect card elements
- Barcodes or magnetic stripe encoding
- Unique branded tactile impressions
- Ultraviolet difficult-to-copy layers
- Durable substrate layers

ID CARD FUNCTIONALITY

Utilize your ID cards to their fullest potential by integrating them with other tools such as card technology, hardware, and software solutions to perform event tracking, access control, digital credentials, campus cards, and much more!

Adding card functionality brings more value, access to data, and user loyalty to your identification and accountability program. One card can be the source of numerous security measures, enhance the user's experience while in your facility or on campus, and supports internal processes and programs by routinely collecting data and tracking activity.

SECURE ACCESS

ACCESS CONTROL

Elliott offers a wide range of access control systems using the latest hardware and software technology available to enhance facility or campus security. These solutions may be used as a stand alone access control system or integrated with video surveillance and identity management software, to create a more comprehensive security program.

VISITOR MANAGEMENT

Quickly identify, log, and print badges for visitors within seconds using a three step process that provides the accountability organizations need to secure their facility and the people within.

VIDEO SURVEILLANCE

Monitor facilities using live stream, capture IP security camera video, incorporate video analytics, and access control with video management to enhance your security program. Control user access using permission-based software and device configuration. Generate reports, retrieve video footage and export data.

LOGICAL ACCESS

Add an extra layer of security to network access using Two-Factor or Multi-Factor Authentication. This multiple step verification process provides greater security than a username and password alone, making it harder for unauthorized users to gain access and steal vital data. Two-factor hardware tokens may be smartphones, USB drives, key fobs, card readers, etc.

CAMPUS CARD SOLUTIONS

Maximize the potential of student IDs using an all inclusive system that connects users to a wide variety of functionality such as building access, cashless payment, account management and activity tracking. Benefit from a positive user experience on your campus that strengthens student and staff loyalty.

LOCAL VS CLOUD

Many of the identification, secure access and accountability solutions Elliott supports, offer the option for cloud or local hosting. Our team of certified technical staff is available to provide as much or as little assistance users desire for training, installation, and maintenance of these solutions.

LOCALLY HOSTED

An on-premises integration platform is an option for organizations with active IT departments, who prefer to host and manage software solutions internally on their own servers, keeping control of all software in their own hands.

Benefits/Pros

- Physical control of server
- Keeps data in-house
- Internet not required to access data
- Freedom to perform software integration & maintenance

CLOUD HOSTED

Cloud computing is a secure, worry-free integration platform used by a growing number of organizations to manage software solutions. Using a subscription based cloud server leaves the burden of software maintenance to us, ensuring a high level of up-time and delivers greater mobile accessibility for authorized users.

Benefits/Pros

- Perfect for organizations with limited technical resources
- Ability for greater scalability as organizations grow
- Leaves server bandwidth free for other applications
- Connect from anywhere using mobile devices
- Provides off-site data back up & redundancy

A VALUE ADDED SOLUTION FOR ANY LEVEL SECURITY PROGRAM

>> Benefits of Adding Access Control

- > Centrally controlled security by authorized users.
- > Block unwanted intrusions at the point of entry.
- > Efficient re-issuance & lost key processes.
- > Avoid door code/combination sharing.
- > Restrict access to authorized personnel.
- > Set automated door open/lock schedules.
- > Easily perform evacuation mustering checks.
- > Generate reports on door activity.

>> Preexisting Access Control System Benefits

- > What was secure before might not be now. Prox cards are easily copied on the street, while smart cards are more secure.
- > You might be overpaying for card supplies & can reduce your budget with a simple quote.
- > Access control is now compatible w/smart phone credentials.
- > Easily leverage your cards for two-factor authentication.
- > If you have a system but don't have the technical support you need, you might want to consider outsourcing tech support.

ACCOUNTABILITY SOLUTIONS

BASIC TRACKING

Collect data and provide greater accountability to programs and processes by tracking people, places and things during routine or special events. Time stamp activity, perform check-in/out, generate reports using PC workstations, handheld devices, smartphones, or other mobile devices.

CREDENTIAL & DATA MANAGEMENT

Electronically organize and manage data across multiple locations. Perform personnel data management, print & issue IDs, and build a network of Administrators who work with interoperability by sharing data across your organization.

ASSET TRACKING

Identify and electronically manage assets to expand available resources across your organization and work with greater efficiency. Manage inventory levels, build a centralized database, identify assets, assign assets, time stamp activity, and much more.

SOPHISTICATED TRACKING

Work more efficiently by tracking activity on-site during routine events, emergency incidents, and any large-scale events. Empower staff by having detailed personnel data at their fingertips using a very comprehensive event tracking system. Support audit trails and internal processes by generating event activity and personnel reports.

Elliott identification and accountability solutions are used to increase efficiency and interoperability throughout organizations. These solutions may work independently or integrated together to create a more powerful system.

SERVICE & SUPPORT

Elliott Data Systems, Inc. is a technology solutions provider who supports integrated identification, accountability, and secure access solutions for local organizations throughout the region. These automated solutions provide secure credentials, comprehensive data management, greater physical security, and more accountability than manual processes can deliver.

Elliott offers everything you need to implement value-added solutions to your organization. Select from innovative product and professional services fulfilled by a locally established company with 50 years of experience and a team of friendly, well equipped professionals who deliver successful solutions every day.
