## ID ISSUANCE

### ID CARD ISSUANCE

Elliott works with users to create and support a comprehensive, cost-effective photo identity program that makes sense for organizations.

*Choose from desktop or high issuance printers, ID software, and photo capture devices to build your ID card printing system.*

**ID SOFTWARE**

### DIGITAL CREDENTIALS

Manage IDs digitally and protect identity data using enhanced security during online and mobile transactions.

**MOBILE IDS**

### ID CARD SUPPLIES & ACCESSORIES

Choose from an array of ID card supplies and accessories that support anything from basic ID card stock and lanyards to high level security feature supplies such as smart chip/EMV cards and holographic laminates.

**ID PRINTERS**

*Contact Elliott to request FREE accessory samples!*

*Ask Elliott about their Smart Trade program to learn how much your old ID card printer is worth upon trade-in.*

*Design a Lanyard*

*View ID Catalog*

*Order ID Supplies*

# Next-Generation Credentialing Technology

## TRANSFORMING ID CARDS

### ID CARD FUNCTIONALITY

Utilize your ID cards to their fullest potential by integrating them with other tools such as card technology, hardware, and software solutions to perform event tracking, access control, digital credentials, campus cards, and much more!

Adding card functionality brings more value, access to data, and user loyalty to your identification and accountability program. One card can be the source of numerous security measures, enhance the user's experience while in your facility or on campus, and supports internal processes and programs by routinely collecting data and tracking activity.

Biometric Cards

Tactile Impressions

Contact/Contactless Smart Cards

### CARD TECHNOLOGY

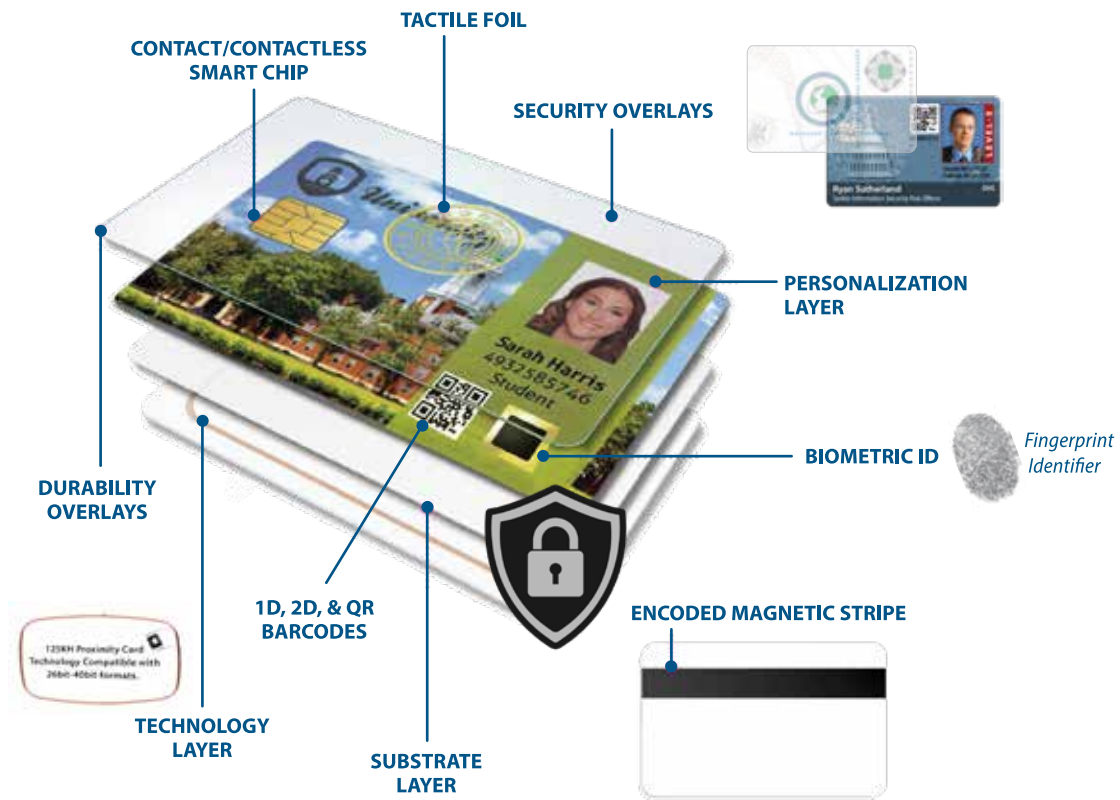

ID plastic card technology plays a critical role in modern security, identification, and access control systems across a wide range of industries. These durable cards can be customized with embedded technologies like magnetic stripes, key fobs, smart chips, or RFID for enhanced functionality and unique branding features such as tactile impressions, colored core, or card styles making duplication difficult.

# SECURE IDENTIFICATION

## SECURE ID CREDENTIALS

Print secure credentials backed by intelligent technology. Personalized ID cards and badges grant cardholders access to protected areas or networks, while reducing the risk of fraud using high quality printed credentials and security features.

## ID CARD FEATURES

Protect ID cards against fraud and counterfeiting using secure features such as:

- Security overlays such as holographic, microprinting, or OVDs.
- Contact or contactless smart card or RFID technology.
- Personalization with photos, signature, etc.
- Durability overlays to protect card elements.
- Duraguard security layer or unique design laminates.
- Barcodes, QR codes or magnetic stripe encoding.
- Store secure, encrypted data & authenticate users.
- Unique branded tactile impressions.
- Ultraviolet difficult-to-copy layers.
- Durable substrate layers.

## SECURE ACCESS

### ACCESS CONTROL

Elliott offers a wide range of access control systems using the latest hardware and software technology available to enhance facility or campus security. These solutions may be used as a standalone access control system or integrated with video surveillance and identity management software to create a more comprehensive security program.

*Manage door access securely from mobile devices anywhere while utilizing automated AI-driven analytics integrated with wired, wireless, and biometric readers - supporting smarter operations and enhanced security.*

AC SOFTWARE

AC HARDWARE

### VISITOR MANAGEMENT

Follow a three-step process that provides the accountability organizations need to secure their facility and the people within.

*Quickly identify, log, & print badges for visitors within seconds!*

SOFTWARE & ACCESS CONTROL  
INTEGRATION

### LOGICAL ACCESS

#### Multi-factor Tokens

This multiple step verification process provides greater security than a username and password alone, making it harder for unauthorized users to gain access and steal vital data.

- Smartphones
- Card Readers
- USB Drives
- Etc.
- Key Fobs

*Add an extra layer of security to network access using Two-Factor or Multi-Factor Authentication.*

VERIFICATION SOFTWARE

# INTELLIGENT VIDEO MONITORING

## VIDEO SURVEILLANCE

Monitor facilities to enhance your security program using live stream, capture IP security camera video, video AI analytic features, and access control integration utilizing video management. Control user access with permission-based software and device configuration. Generate reports, retrieve video footage, and export data.

### VIDEO SURVEILLANCE SOFTWARE

*Experience elevated video surveillance quality using AI analytics for precise searches, facilitating swift incident investigations.*

### VIDEO SURVEILLANCE HARDWARE

### SMART SOLUTIONS

*Combining a cloud-first architecture with advanced AI, your video system becomes a strategic asset—not just a security solution.*

#### AI Analytic Features

- Cybersecurity
- Advanced AI-Driven Searches
- Vision Object Analytics
- Visualization Shortcuts
- Forensic Analysis
- Smart Detection for:
  - > Traffic Management
  - > Facilities Management
  - > Crowd Management
- Case Vault
- Device Health Monitoring
- Reports

# CONCEALED WEAPONS DETECTION

## ENTRANCE SCREENINGS

Identify potential threats at entry points using cutting-edge sensors and AI technology - all while allowing people to move freely through screenings.

- Reduce congestion & minimize disruptions to traffic flow.
- Receive clear visual & audio alerts to guide secondary screenings.
- AI algorithm updates support high accuracy in detecting threats.
- Designed for mobile deployment in indoor & outdoor environments.

## INTELLIGENT BAG SCREENINGS

Balance safety with a positive visitor experience using a modern bag screening solution to:

- Pinpoint the location of concealed weapons and differentiate them from everyday items in bags using advanced AI & high-speed x-ray imaging technology.
- Integrate with Evolv Express and MyEvolv analytical software to support an Evolv Safer Experience System layered security approach.
- Allow people to walk through at a normal pace while bags are scanned at a rate of 0.75 m/sec - eliminating the need to stop unless a potential threat is detected.

## OPERATIONAL INSIGHT

Utilize operational metrics to help enable more proactive, data-driven security.

- Security teams access & manage screening activity via web & mobile devices.
- Visual dashboards, analytics, & regular automated reports drive operational efficiency.
- Explore and compare critical data around visitor flow, alarm statistics, threat counts, and system performance.

**Evolv Express®**  
**SAFETY Act Designation as**  
**a Qualified Ant-Terrorism**  
**Technology (QATT)**

*Awarded by the U.S. Department  
of Homeland Security (DHS)*

## ACCOUNTABILITY SOLUTIONS

### **BASIC TRACKING**

Collect data and provide greater accountability to programs and processes by tracking people, places, and things during routine or special events. Time stamp activity, perform check-in/out, generate reports using PC workstations, handheld devices, smartphones, or other mobile devices.

### **CREDENTIAL & DATA MANAGEMENT**

Electronically organize and manage data across multiple locations. Perform personnel data management, print & issue IDs, and build a network of Administrators who work with interoperability by sharing data across your organization.

### **ASSET TRACKING**

Identify and electronically manage assets to expand available resources across your organization and work with greater efficiency. Manage inventory levels, build a centralized database, identify assets, assign assets, time stamp activity, and much more.

### **SOPHISTICATED TRACKING**

Work more efficiently by tracking activity on-site during routine events, emergency incidents, and any large-scale events. Empower staff by having detailed personnel data at their fingertips using a very comprehensive event tracking system. Support audit trails and internal processes by generating event activity and personnel reports.

Elliott identification and accountability solutions are used to increase efficiency and interoperability throughout organizations. These solutions may work independently or integrated together to create a more powerful system.

# Elevate Your Cardholder Experience

## INSTANT FINANCIAL ISSUANCE

**Fast, Secure  
In-Branch Issuance**

**On-Demand  
Choice of Card**

**Compliance &  
Security Standards**

### FINANCIAL CARDS

Quickly create personalized card designs that complement your brand and print secure flat financial cards utilizing durable graphics technology while performing instant issuance.

**IFI PRINTERS & SOFTWARE**

### DIGITAL BANKING CARDS

Instantly issue digital payment credentials directly from your bank or credit union mobile application to your cardholders mobile wallet for immediate access to account funds.

### MOBILE PAYMENT

*Quickly & easily give customers what they want: an instant, digital-first payment experience!*

***Ensure a 100% activation rate and give  
your cardholders instant purchasing power.***

## SERVICE & SUPPORT

*Over 50 years of innovative solutions & professional service.*

### ABOUT US

*Scan to watch Elliott's About Us video.*

As a regional technology solutions provider, Elliott Data Systems, Inc. specializes in integrated identification, secure access, and accountability. Our automated systems enhance physical security and data management, empowering organizations to achieve their SMART goals through innovative, scalable technology.

## PROFESSIONAL SERVICES

Elliott Data Systems, Inc. is focused on your success every step of the way.

### ANALYSIS & DESIGN *Complementary*

- Evaluation & analysis consultation.
- Solution design & product overview.
- Remote or on-site demonstrations.
- Solution quotes & product specs.

### SOLUTION INTEGRATION

- Software & hardware setup.
- Custom system configurations.
- Software & hardware integration.
- System testing before installation.

### INSTALLATION & TRAINING

- Solution installation & implementation.
- Technical & user system training.
- Remote & on-site training options.

### TECHNICAL SUPPORT

- Perform software upgrades.
- Hardware maintenance service.
- Troubleshoot systems.
- Technical support video.
- Remote, phone & on-site technical support.

### CUSTOMER SERVICE

- Answer customer questions.
- Place supply & accessory orders.
- Place technical support tickets.
- Processing orders & shipping.
- Connecting you with the right Elliott team member.

## STAY CONNECTED

### CONTACT ELLIOTT DATA SYSTEMS, INC.

We're here to connect with you however you prefer. Reach us by phone, email, online chat, through our website, or on social media. Our team is accessible and ready to provide sales guidance, technical support, and customer service - answering your questions and helping you find the right solutions to meet your needs.
